

# Australia's ONLY

## non corrosive chemical for removing concrete buildup

### What is Liquid Hammer?

**LIQUID HAMMER** is a water-based, environmentally friendly chemical for cleaning concrete and mortar off your machines, vehicles and tools.

**LIQUID HAMMER** can safely remove cement-based materials from almost any surface.

### Effective

**LIQUID HAMMER** can be applied as a foam, as well as a liquid  
 → When sprayed on machinery, foam "clings" to vertical surfaces-allowing more effective cleaning with reduced wastage and run-off.  
 → As a liquid form, it can be used to soak hand tools and forms.

### 100% Biodegradable

**LIQUID HAMMER** has been formulated for "on-site" usage. It is safe for use in applications where containment measures are not available to collect run-off.

**LIQUID HAMMER** does not contain any hydrochloric, muriatic, phosphoric or citric acids. Equipment can be cleaned without fear of environmental hazards.

### Safe

**LIQUID HAMMER** is non-corrosive. This means that even sensitive engine components can be cleaned without fear of damage.

**LIQUID HAMMER** is safe to use on bare steel, aluminum, fibreglass, brass, copper, plastic, glass, and on most painted surfaces. Always test a small area first, and ensure you follow the instructions.

### Seeing is Believing

Before

After

### Use LIQUID HAMMER to Clean

### How Liquid Hammer Works

Step 1

Liquid Hammer is sprayed as foam.

Step 2

The foam sticks to the concrete - less waste.

Step 3

Liquid Hammer dissolves the concrete.

Step 4

Hard concrete is turned into paste to be easily removed.

### Liquid Hammer Sprayers

#### Sprayers For Large to Medium Applications

LH Foam Sprayer

LH 8L Foamer

LH 5L Foamer

#### Sprayers For Small Applications

LH 1L Foamer

LH Trigger Bottle

LH Aerosol
