

LS-SERIES

Compact Thermal Night Vision Monocular

A TACTICAL ADVANTAGE IN THE PALM OF YOUR HAND

Introducing FLIR LS-Series, the newest compact thermal night vision camera designed specifically for law enforcement. For years, law enforcement agencies around the world have been using FLIR's handheld systems for surveillance, pursuit, capture and evidence gathering. All of FLIR's considerable experience in law enforcement and military applications culminates in FLIR LS-Series.

No matter how clever a suspect may be, they can't hide their heat. Rather than rush on the scene with a flashlight that instantly gives away your position and only illuminates your immediate area, FLIR LS is just as portable, and exponentially more effective. You can see in pitch black conditions where traditional night vision fails. You can see through smoke, dust and light fog. Even light foliage and camouflage are powerless against thermal imaging. You'll be just as successful using FLIR LS during the day as you will at night. Take away every hiding spot with FLIR LS-Series.

Visit www.FLIR.com/LS-Series for more information, including a product selector guide, interactive simulator, case studies, videos and more.
